INVESTMENT REALLY IS A SIMPLE WORD

It's about creating wealth for yourself or your family in the future, by 'saving' in an unconventional way.

We're all quite used to the idea of channeling most of our cash and earnings into Savings Accounts and Fixed Deposits at Banks, even if they give us meager returns and hold our money for long periods of time. Most times, we are left with only a fraction more than we initially put in, and we don't really let our money work hard enough for us.

It's Time we looked at "saving" a little differently. Our Wealth Funds are a collection of simple investment products, most of which work exactly like a savings account or fixed deposit on the surface, but are harder-working and give you comparatively higher returns.

You can choose to 'save' with just one fund or a combination of many, in different proportions which gives you the option of custom creating your very own retirement fund, education plan or income plan for the future.

Income from wealth funds are credited daily, which means you can actually watch your money grow, every single day. They are also completely TAX FREE. The rate you see, is the rate you get. Deposit and withdraw your cash anytime it doesn't get simpler than that.
